

This law has let me take back my time at home. I do not and will not do commerce over the phone. The telemarketers intrude on my time. If I needed a product I would certainly call someone or visit a store to obtain the product. Useless conversations just cause me to get annoyed and usually the call ends rudely. I appreciate the law because I do not receive nuisance calls. It has alleviated me from having to go to the phone over and over again (sometimes 10 or more times a day) for useless calls. Please leave the law alone.
